

Organization Diagram of Analytical Methodology Research Division (AMR/ORD)
Proposed Mix of Disciplines Subject to Continuing Review

SUBJECT: Establishment of Analytical Methodology Research
Division (AMR/ORD)

- . Assessing and advancing applicable Social, Behavioral and Information Science techniques and technologies
- . Selectively investigating feasibility of reducing such new concepts to practice
- . Providing directed Social, Behavioral and Information Science support to other Agency components as appropriate

4. Creation of the Analytical Methodology Research Division from an amalgamation of Life Sciences Research and the Center for the Development of Analytical Methodology is intended to:

- . Provide a better posture for attack on interdisciplinary problems
- . Achieve a critical mass of resources and focus these on fewer, more significant program elements thus allowing more effective management
- . Provide a more attractive career path for professionals, thus facilitating the maintenance of key disciplines

5. As shown in the attached organization diagram, the Analytical Methodology Research Division will be supervised by a Chief who will have full management responsibility for the personnel and researches of the Division. Substantive responsibility for major research areas serviced by this Division will be assigned to the Principal Social Scientist for disciplines ranging broadly from Biomedical to Management Sciences and to the Principal Information Scientist for disciplines ranging from Computer Science to Operations Research.
